

AD-01 DC Power Supply (optional)

Scientech AB01 Silicon, Zener, LED Diode Characteristics is a compact, ready to use Diode Characteristics experiment board. This is useful for students to plot V-I characteristics of Si Diode, Zener Diode, and Light Emitting Diode in forward as well as in reverse bias region of operation.

Scientech Analog Electronics Experiment Boards are designed as a comprehensive Modular solution for beginners to explore the fundamentals of a variety of basic building blocks in Analog Electronics. The boards are very user friendly and support self learning through flexibility of making circuit connections. Schematic diagrams on the boards provide easy understating of the concepts. Test points are provided to observe the waveforms/ signals and to measure voltages at different nodes. The boards can be used as standalone unit with external DC Power Supply, or can be used with Scientech Analog Labs; Scientech 2612/ Scientech 2612A / Scientech 2613. These labs have built in DC Power Supply, AC Power Supply, Function Generator, Modulation Generator, Continuity Tester, Toggle Switches, and Potentiometers. Product Tutorial with theory, description, explanation, procedure, references and results is available online on www.ScientechLearning.com .

Features

- On board test points to observe signals
- On board schematic diagram
- Flexibility of making circuit connections
- Light weight & compact
- Online Product Tutorial

Scope of Learning

- Study of V-I characteristics of Silicon Diode
- Study of V-I characteristics of Zener Diode
- Study of V-I characteristics of Light Emitting Diode (LED)

Optional

- AD-01 DC Power Supply ($\pm 12V$, $\pm 5V$)
- Simtel Analog Electronics Software

Online Product Tutorial
