

AD-01 DC Power Supply (optional)

**Sciencetech AB42 Operational Amplifier (Inverting / Non-inverting / Differentiator)** is a compact, ready to use experimental board for Operational amplifier. This board is useful for students to study and understand operation of Op-Amp as Differential amplifier, Inverting amplifier, and Non-Inverting amplifier.

Sciencetech Analog Electronics Experiment Boards are designed as a comprehensive Modular solution for beginners to explore the fundamentals of a variety of basic building blocks in Analog Electronics. The boards are very user friendly and support self learning through flexibility of making circuit connections. Schematic diagrams on the boards provide easy understating of the concepts. Test points are provided to observe the waveforms/ signals and to measure voltages at different nodes. The boards can be used as standalone unit with external DC Power Supply and Function Generator, or can be used with Sciencetech Analog Labs; Sciencetech 2612/ Sciencetech 2612A / Sciencetech 2613. These labs have built in DC Power Supply, AC Power Supply, Function Generator, Modulation Generator, Continuity Tester, Toggle Switches, and Potentiometers. Product Tutorial with theory, description, explanation, procedure, references and results is available online on [www.SciencetechLearning.com](http://www.SciencetechLearning.com) .

## Features

- On board test points to observe signals
- On board schematic diagram
- Flexibility of making circuit connections
- Light weight & compact
- Online Product Tutorial

## Scope of Learning

- Study of Operational amplifier as a differential amplifier
- Study of Operational amplifier as an inverting amplifier
- Study of Operational amplifier as a non-inverting amplifier

## Optional

- AD-01 DC Power Supply ( $\pm 12V, \pm 5V$ )
- Simtel Analog Electronics Software
