

AD-01 DC Power Supply (optional)

**Scientech DB05 EX-OR Gate Application** is a compact, ready to use experiment board to prove EX-OR Gate Application. This board is useful for students to study and understand the application of EX-OR gate and operation of Odd Parity Generator, Even Parity Generator and Binary Word Comparator.

Scientech Digital Electronics Experiment Boards are designed as a comprehensive Modular solution for beginners to explore the fundamentals of a variety of basic building blocks in Digital Electronics. The boards are very user friendly and support self learning through flexibility of making circuit connections. Logic diagrams on the boards provide easy understating of the concepts. Test points are provided to observe the waveforms/ signals and to measure voltages at different nodes. The boards can be used as standalone unit with external DC Power Supply and logic data switches, or can be used with Scientech Digital Labs; Scientech 2611/Scientech 2614. These labs have built in DC Power Supplies, Pulse Generator, Pulser Switches, Data Switches, Logic Probe, Digital Display, TTL/CMOS Mode Selector, and LED Display. Product Tutorial with theory, description, explanation, procedure, references and results is available online on [www.ScientechLearning.com](http://www.ScientechLearning.com) .

### Features

- On board test points to observe signals
- On board Logic diagram
- Flexibility of making circuit connections
- Light weight & compact
- Online Product Tutorial

### Scope of Learning

- Study of application of EX-OR Gate
  - ▶ Odd Parity Generator
  - ▶ Even Parity Generator
  - ▶ Binary Word Comparator.

### Optional

- AD-01 DC Power Supply ( $\pm 12V, \pm 5V$ )
- Simtel Digital Electronics Software

### Online Product Tutorial
